## PROFILE

My current career goal is to work as a Full Stack Web Developer. I would not say that I am the traditional web development applicant. My first career was with the US Navy where I served as a Fire Controlman (FC) on a ship maintaining and operating a complex weapon system called the CIWS. After my six-year enlistment, I went to school to earn an AAS in Medical Radiography. After graduation, I worked in healthcare as an X-Ray Tech in a hospital. In both roles I could recognize my gifting in technology and led me to wanting to learn how to code.

The inconsistency of working in healthcare during the COVID pandemic was really what pushed me to finally make the move to pursue a new career. I started self-studying JavaScript and realized how exciting it was to learn new skills like HTML, Java, CSS, and more to create new projects. I knew I needed formal training and decided to enroll in U of Arizona's coding bootcamp to grow my skills. Creativity and functionality are features I believe I do well. My personality is extremely detail oriented and thorough which translates well in this field. My personal interests and hobbies include watching and playing sports, video games, fashion and cooking. A career involving one of those interests would be ideal. I cannot wait to learn from experienced professionals and continue to further myself as a web developer.

## WORK EXPERIENCE

### Radiologic Technologist Abrazo Arrowhead Hospital

📅 07/2017 – present 📍 PHOENIX, AZ

- Substantial Emergency Room and Operating Room experience.
- Experience and training in operating X-Ray technolog C-Arm, Kodak, GE, Fuji, Phillips, Carestream.
